

Scrum Process

Overview

Product Backlog

what we need to do

Product Backlog

Cleanup

- Overall look & feel
- Top/Left pane
- Object pages layouts
- Unique page layouts
- Actions & dialogs
- UI elements
- UI controls

minimal behavior change

Productivity

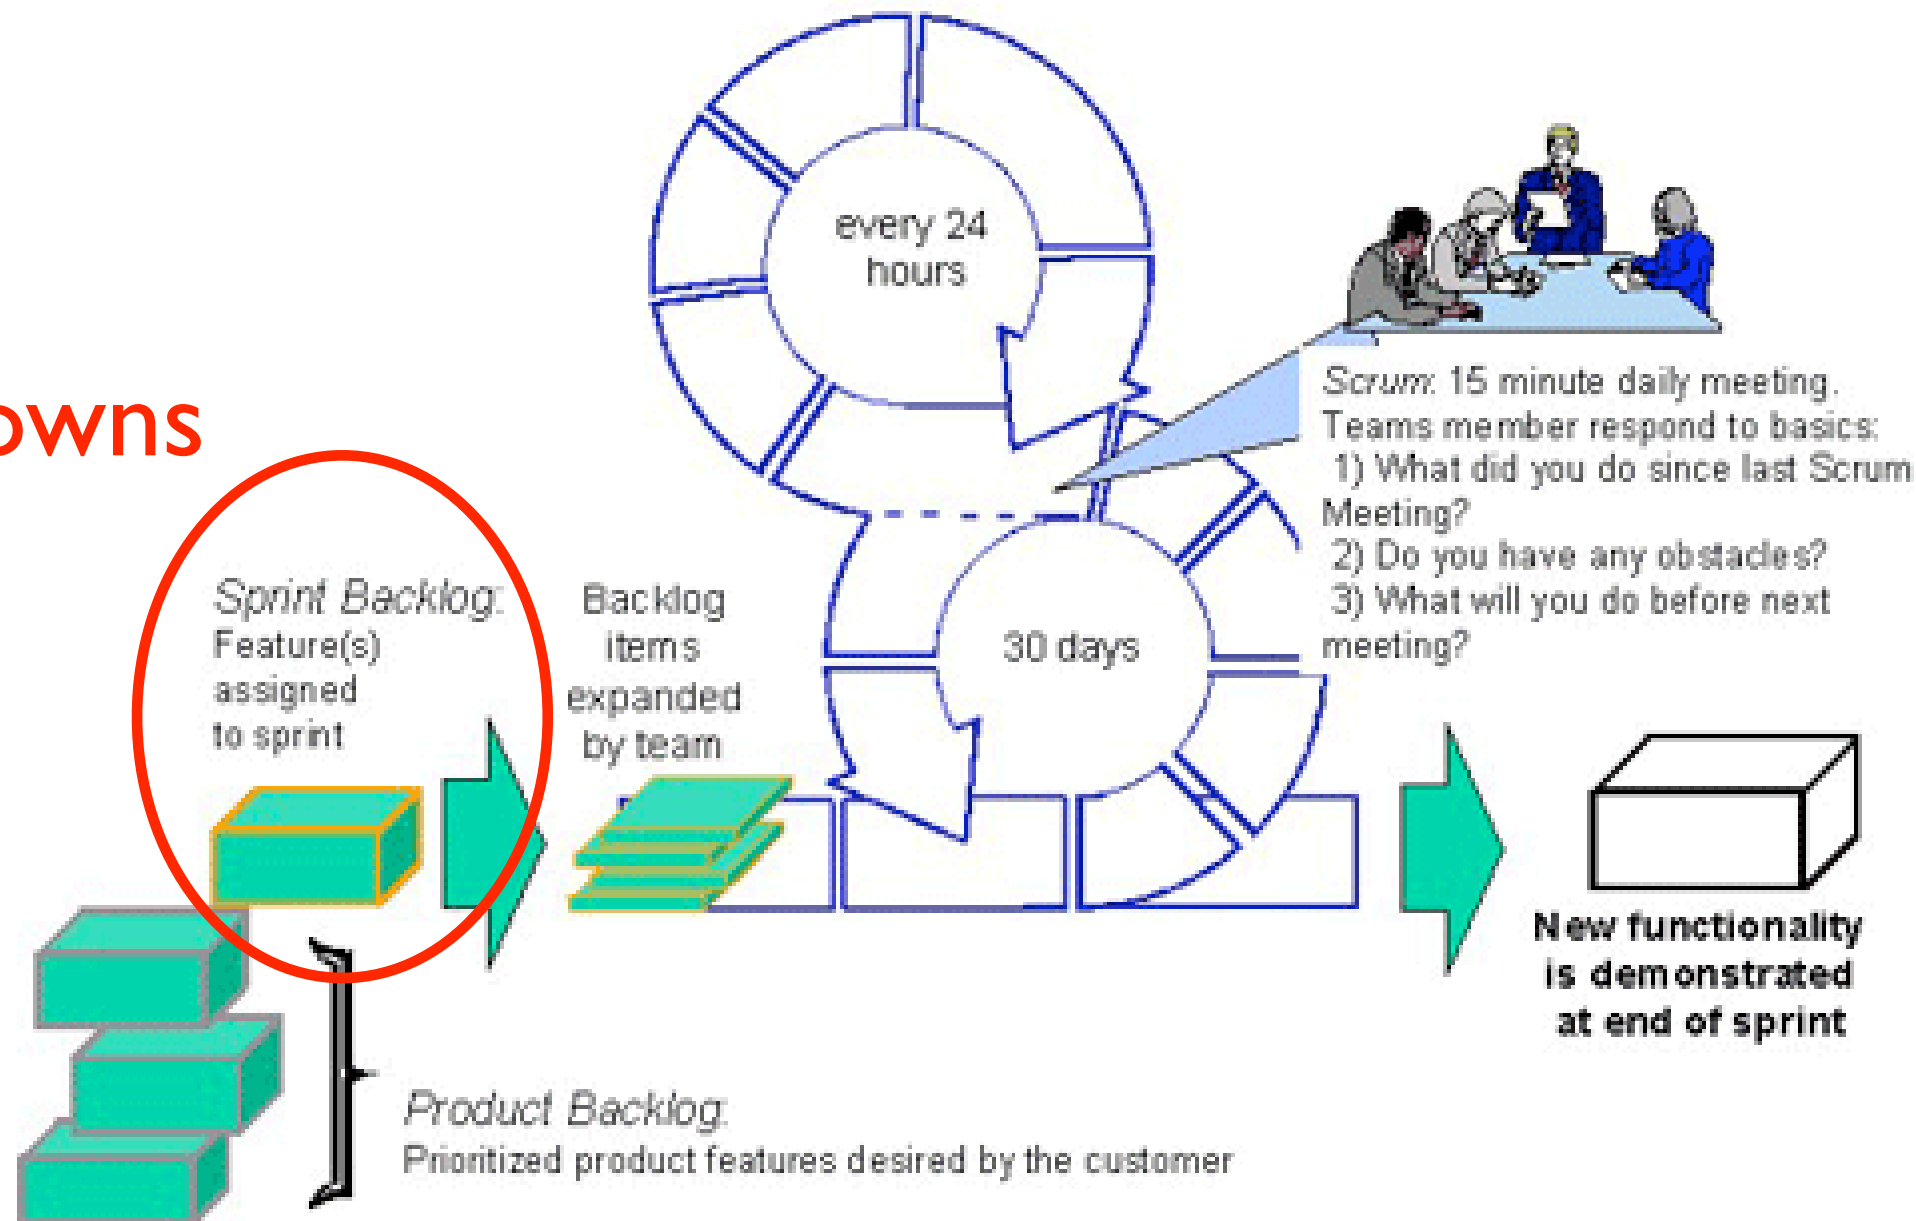

- MDI
- Tree grid
- Export to Excel
- Drag and Drop
- Copy and Paste
- File handling

significant behavior change

Sprint Backlog

when we are going to do it

PM owns

Sprint Backlog

Engineering

- Sprint 1

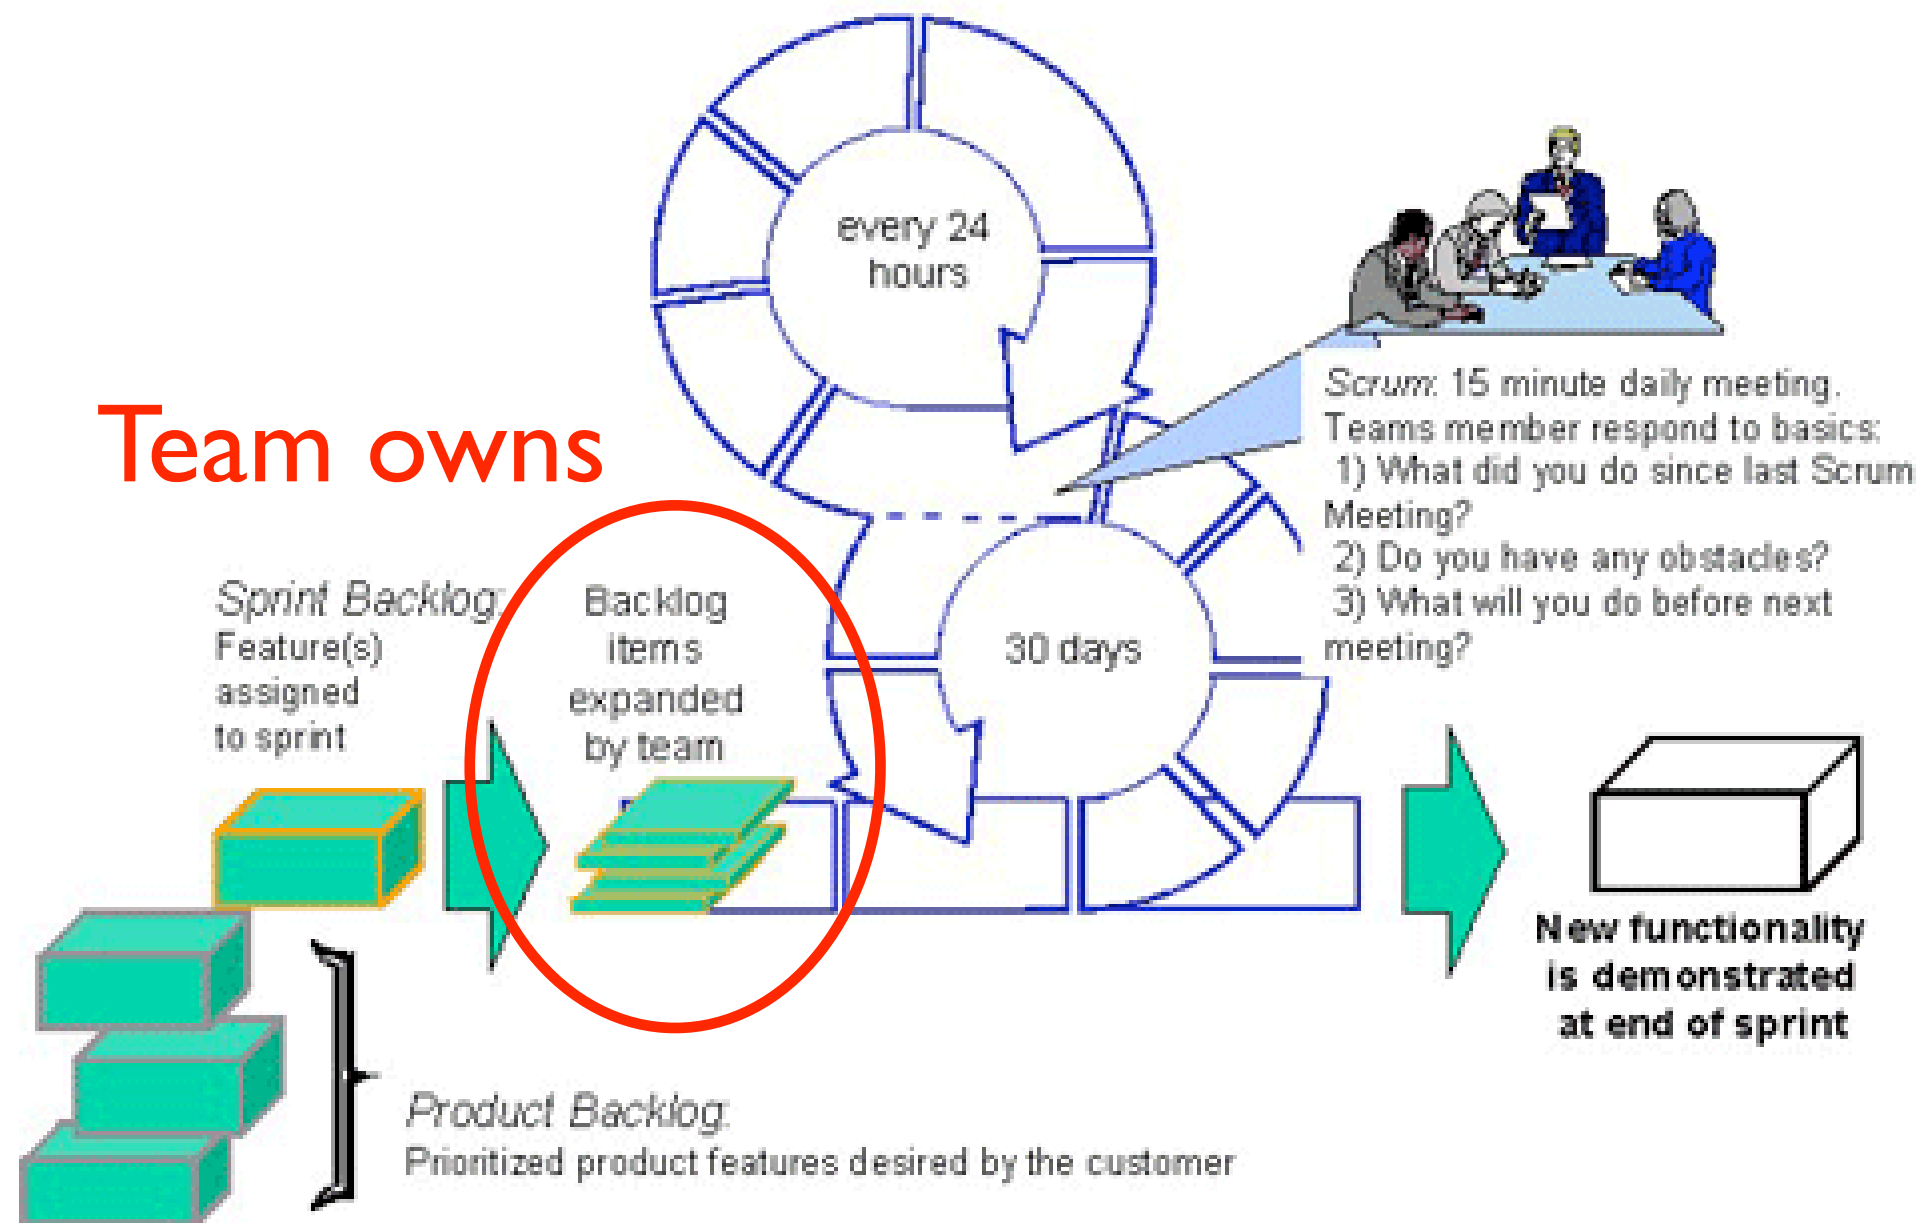

- Complete multi-select list
 - Complete date picker
 - Object header - **header, buttons, tabs, menus**
 - POC table pagination, complete
-

Design

- Design Message Area
- Design & Proto Single Select Search
- Design Object Form
- Design & Proto Multi-Select Cascade List
- Design Multi-Select User Search
- Proto Top Pane
- Proto Left Pane
- Proto Action Dialog
- POC Styling of COQSoft Tree Grid

Sprint Planning

how long we need to do it

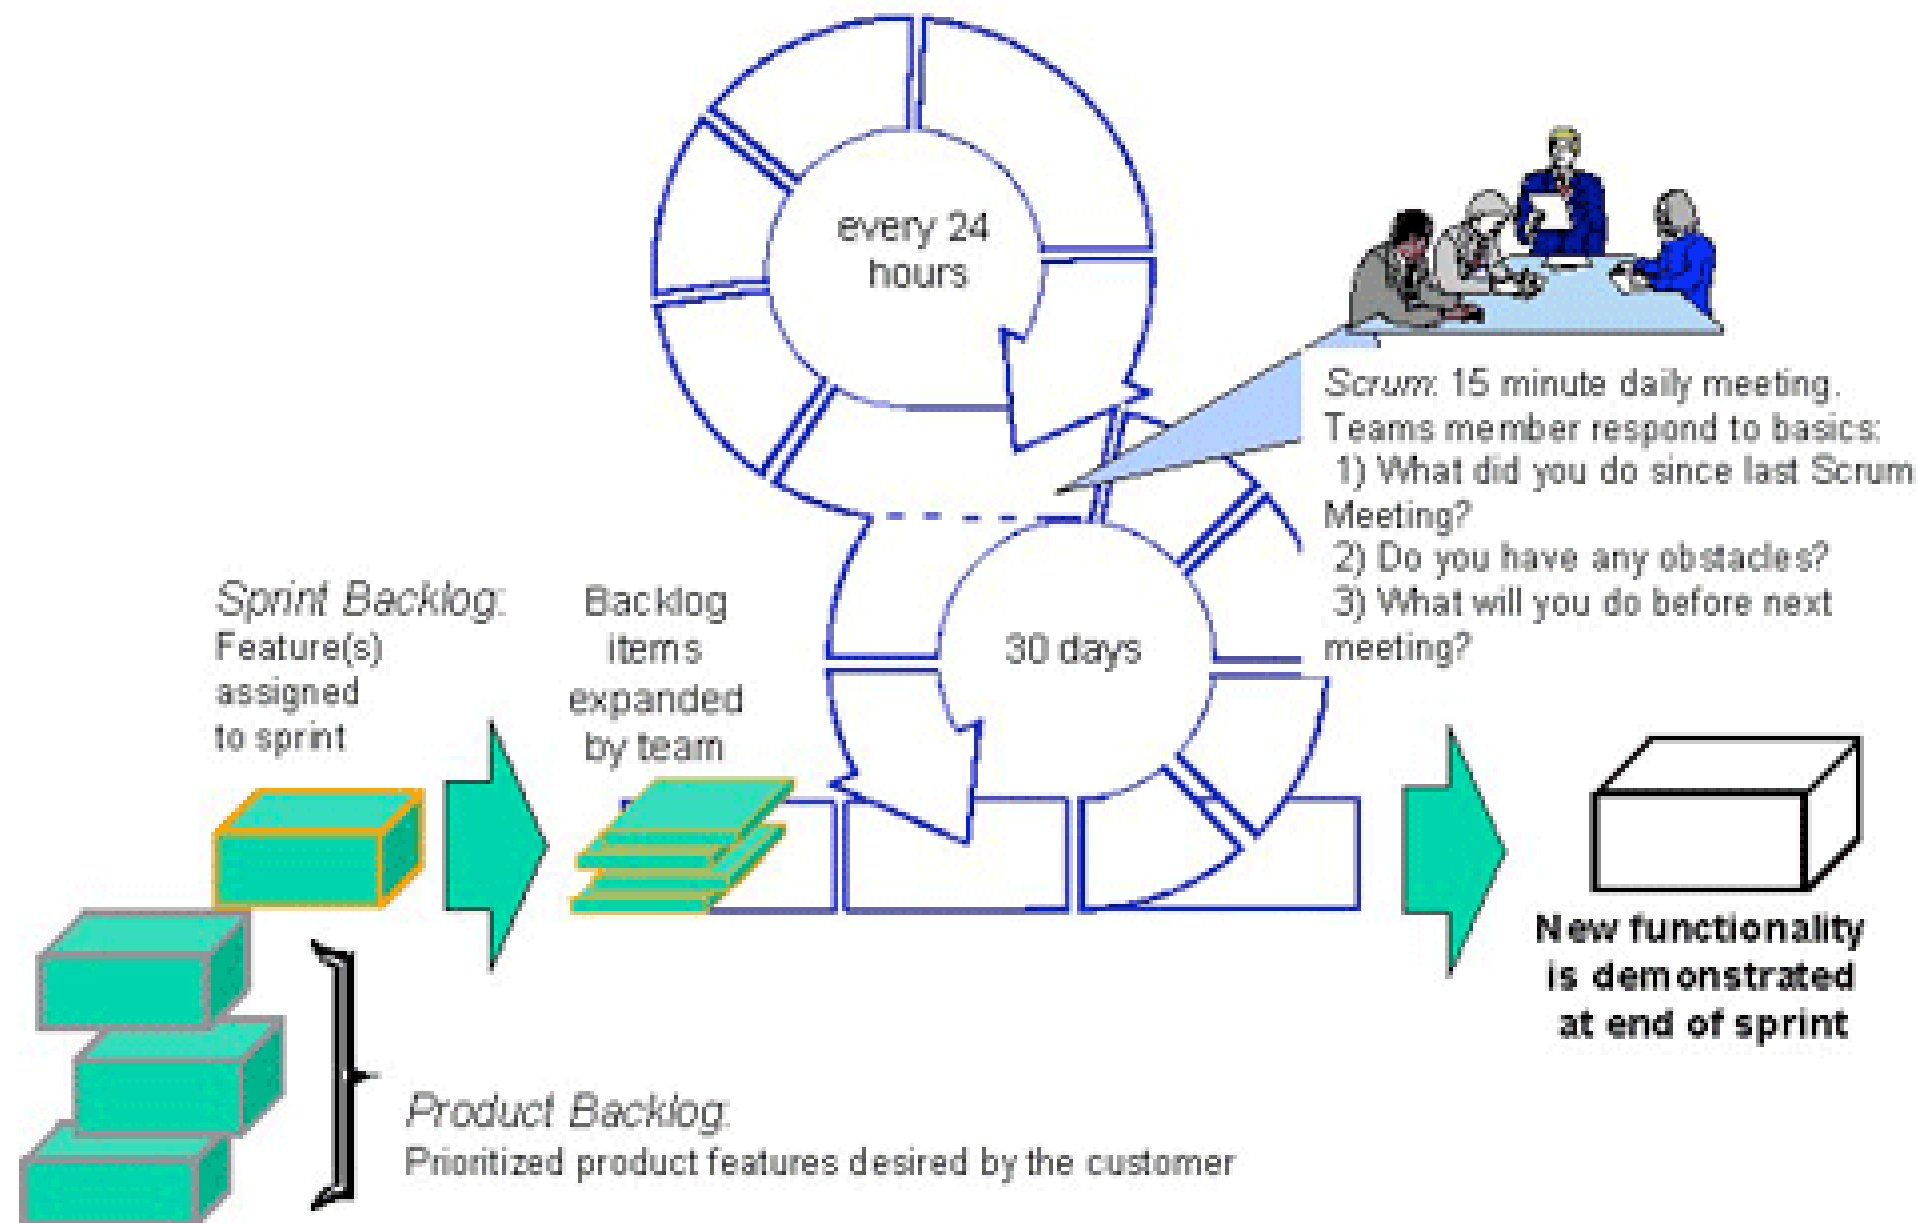

Sprint Planning

| Story | | Tasks | | |
|----------------------------|--------|---|--------------|-----------|
| Name | Points | Description | Owner | Estimated |
| Complete Multi-select List | 8 | Keyboard navigation for pills | Sean | 6 |
| | | Keyboard navigation for palette | Sean | 6 |
| | | Large data set testing | Sean | 3 |
| | | Large column testing | Sean | 1 |
| | | Row palette state highlighting | Sean | 6 |
| | | Column resizing | Sean | 6 |
| | | Integrate admin setting for short list definition | Sean | 4 |
| | | Test case design | Sreenivas | 12 |
| | | Testing | Sreenivas | 24 |
| | | Bug fixing | Sean | 9 |
| | | Regression | Sreenivas | 6 |
| | | Documentation (doesn't include review) | Vern | 12 |
| Complete Date Picker | 8 | Design keyboard interactions | Michele | 6 |
| | | Design completion aid | Michele | 2 |
| | | Design review | Michele | 1 |
| | | Fix IE7 issues | Adler | 4 |
| | | Pull-in 80 fixes from spiffy calendar | Adler | 16 |
| | | Implement on all object forms | Adler | 2 |
| | | Code keyboard interactions | Adler | 8 |
| | | Code completion aid | Adler | 4 |
| | | Test case design | Rukmani | 12 |
| | | Testing | Rukmani | 18 |
| | | Bug fixing | Adler | 8 |
| | | Validate in advanced search summary page | Adler | 6 |
| | | Regression | Rukmani | 6 |
| | | Documentation (doesn't include review) | Vern | 6 |
| Object Header - Buttons | 5 | Design review | Tiffany | 2 |
| | | Resolve Safari Issue | Ralph | 6 |
| | | Prototype testing | | |

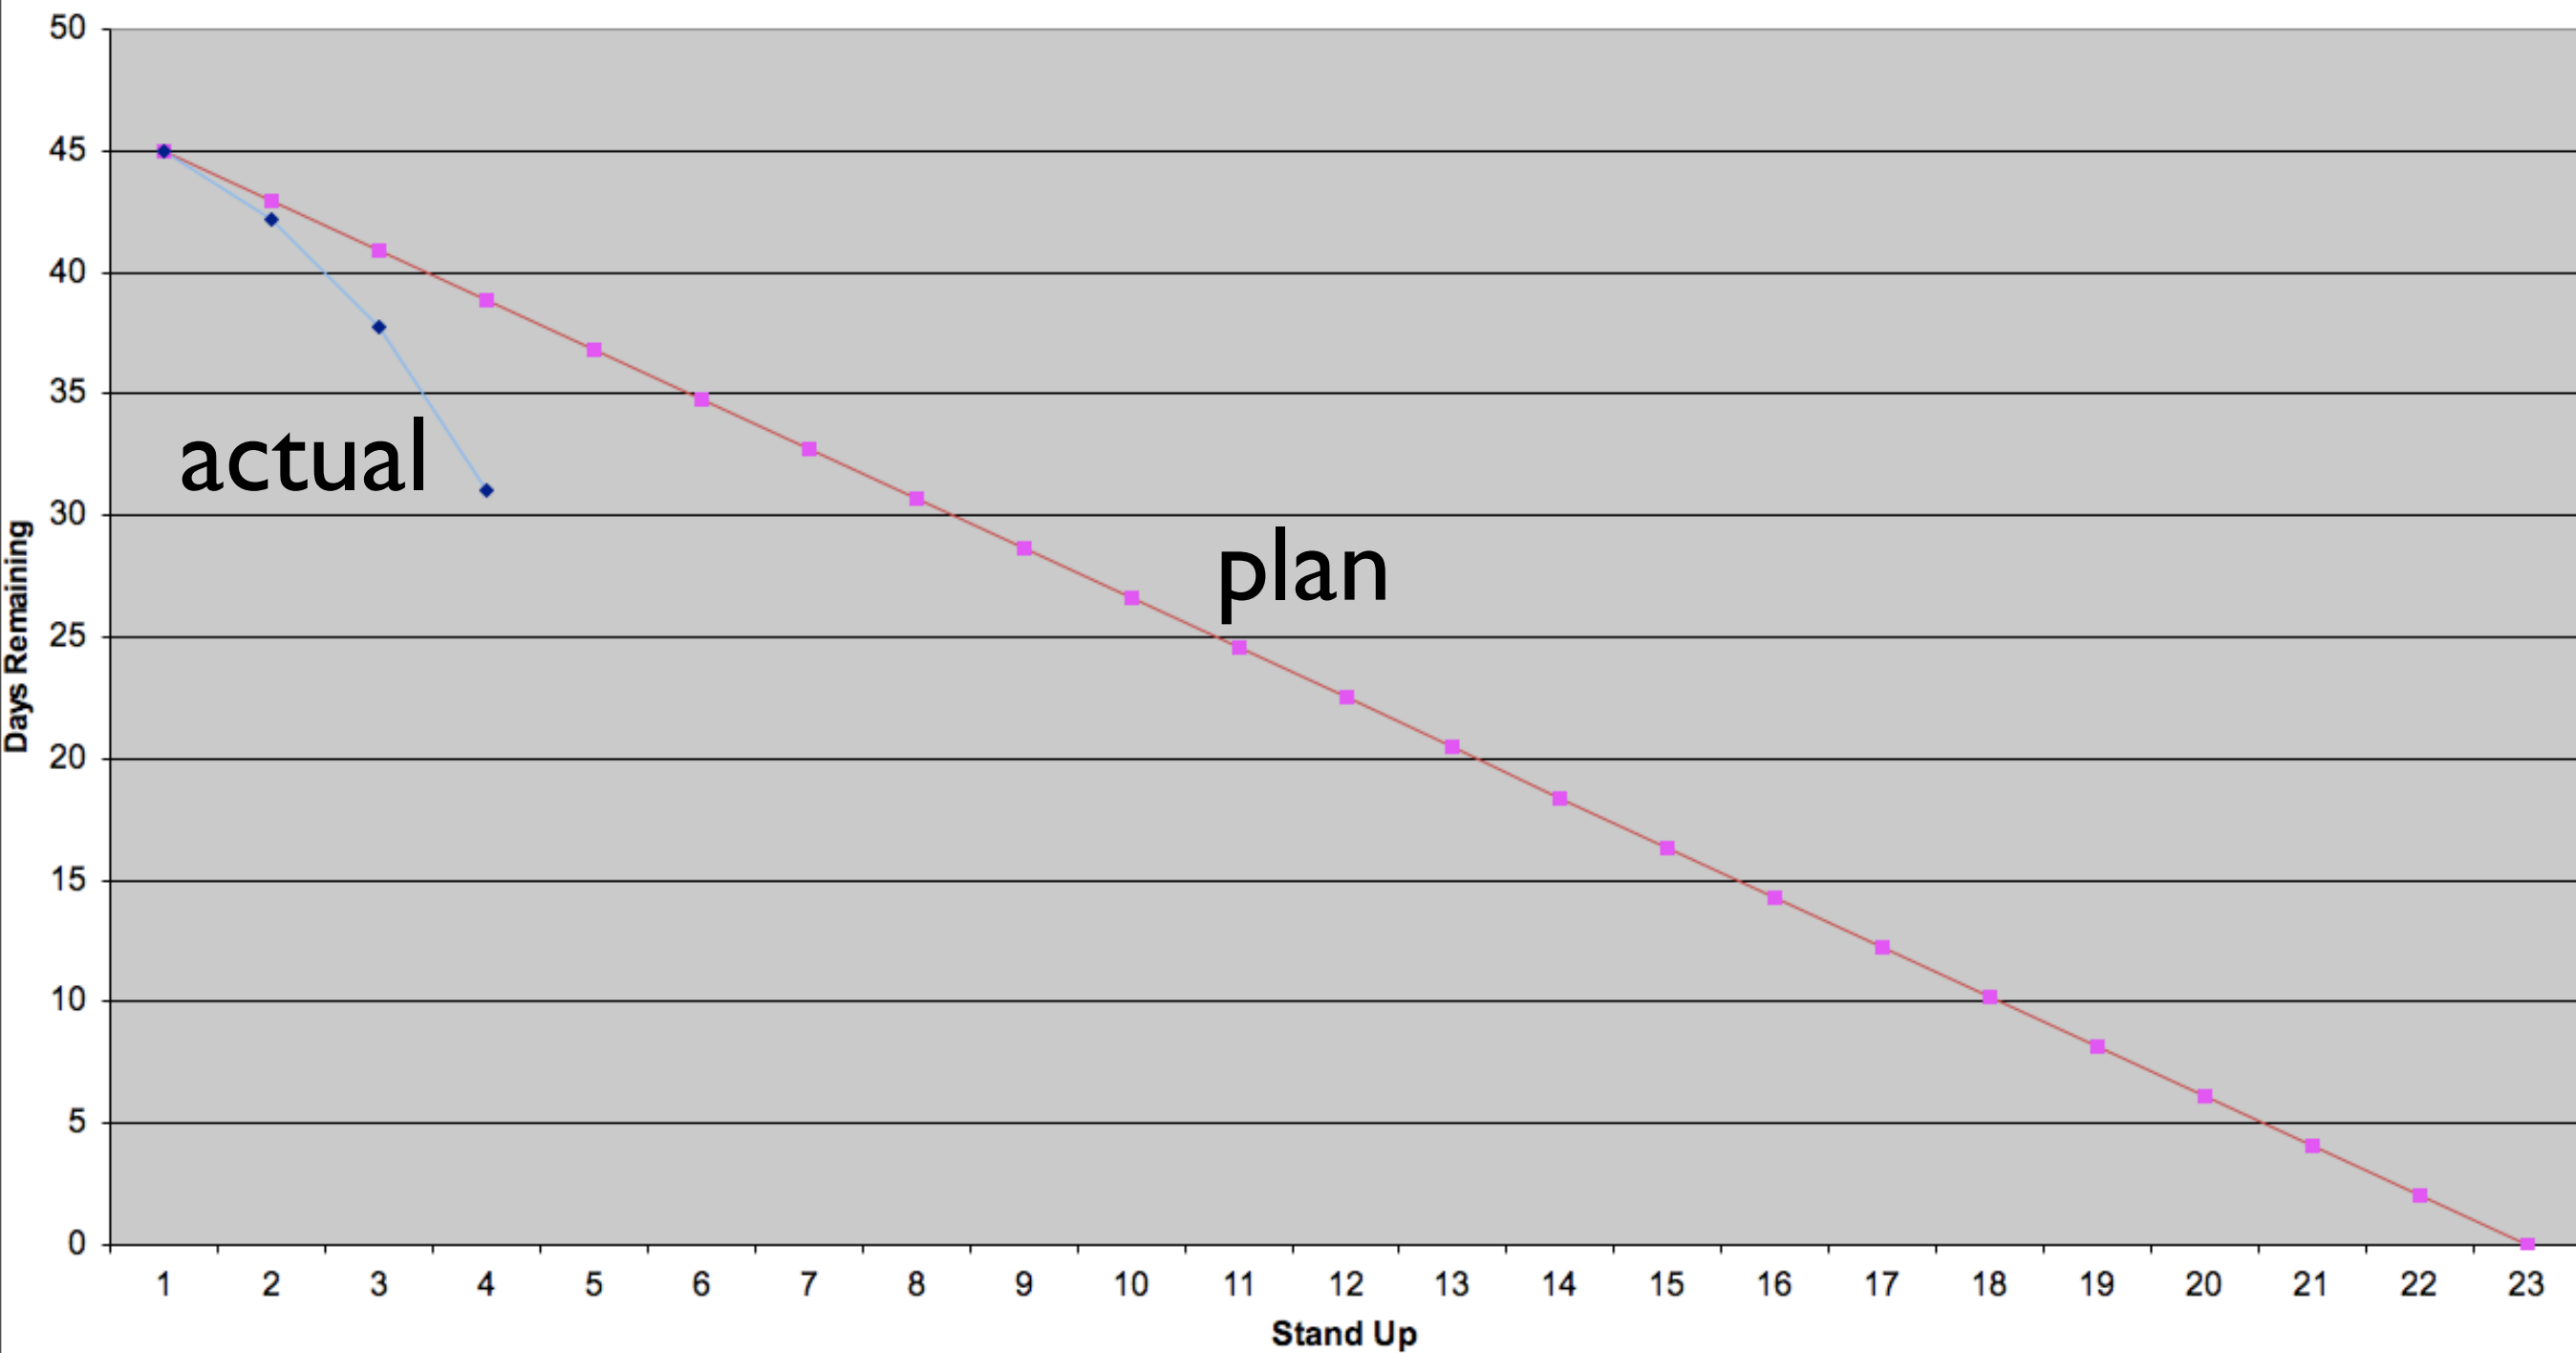

Monitor

are we on-track or off

Burn Down Chart

Burn Down Chart

Sprint Reviews

show and tell; how did we do

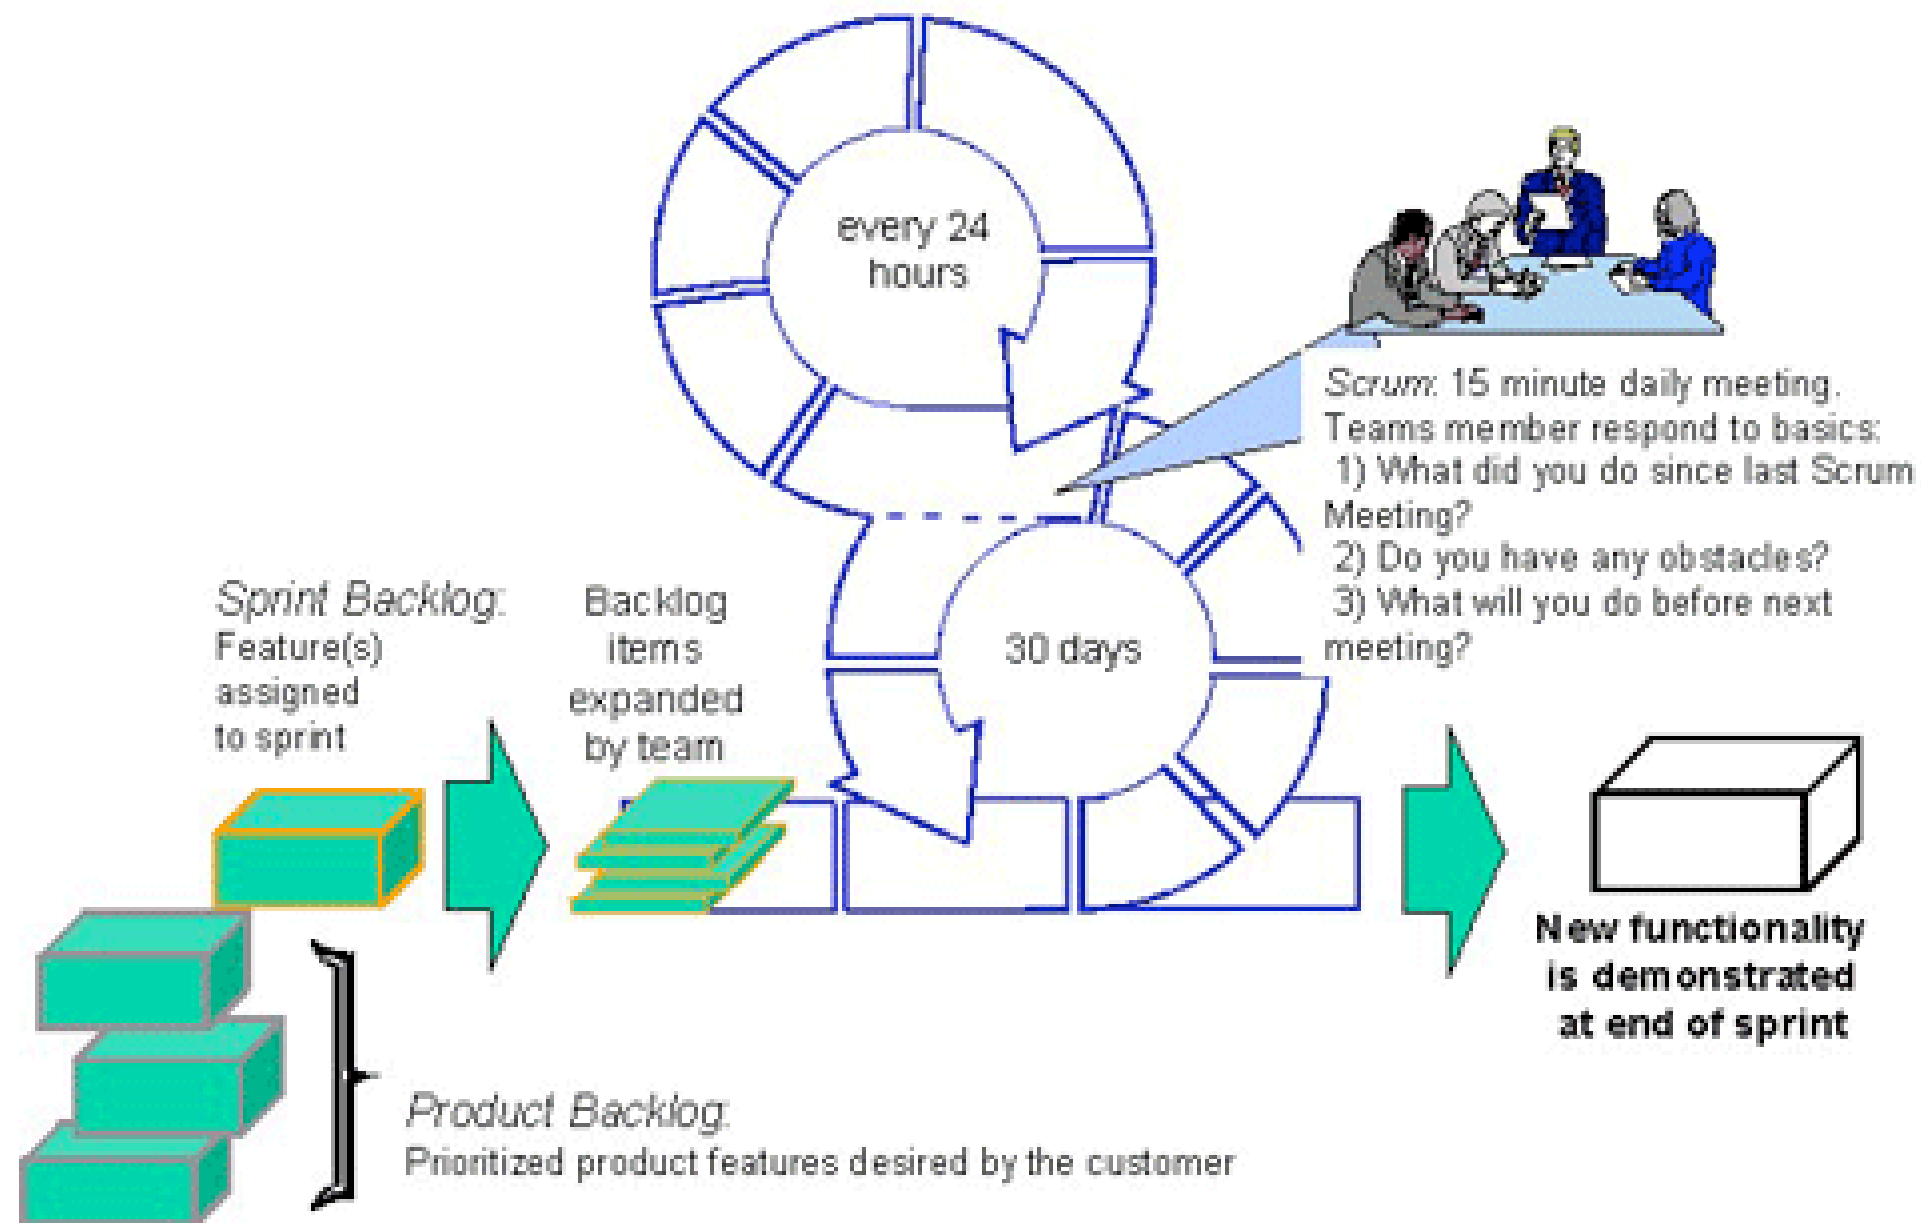

Sprint Reviews

- Planned meeting after each Sprint
- All stakeholders welcome
(starting 25th of May)
- Only TEAM participates and can talk
- Demonstration of work
- Retrospective Open Discussion
 - what went well, poorly
 - corrective action

Velocity

what is our throughput - predicts completion date

Velocity

example only for illustrative purposes - not real numbers

- For the past 4 sprints we averaged 80 units of work per sprint
- Per the backlog we have 1000 units of work
- We can complete this project in 25 weeks (eg: $1000u / 40u$ per wk)

Scoping Process

- **Many inputs**

- CQs via SLA process
- SCs 922 Feedback PPT
 - eg: Dual column presentation, thumbnails

- **Suggested process**

- If request is already in backlog, we add and commit
- If request is not in backlog, PM team determines relative priority
 - if IN: Scrum process will adjust backlog as necessary
 - if OUT: Product Teams communicate non intention to customer
