

HEALTH SCORE

**COST**  
Measures the variance between BOM provided price vs best available price using public sources or variance to your internal part pool pricing.

**GOLDEN DATA**  
Measures quality of BOM parts data (complete, correct, clean, authenticated and verified sources, where/why/when data provenance and timeliness. This is important to understand how accurate the resulting descriptive, diagnostic, predictive and prescriptive analytics are to detected problems.

**LEAD TIME**  
Measures component lead-time availability factored against operational goals. Provides alerts for EOL, lead-time push outs, and allocations events.

**COMPLIANCE**  
Measures the ability of product data to support rigorous examination of import/export compliance requirements. USA (UL), Canadian (CSA), European (TUV), Japan (CB), ROHS.

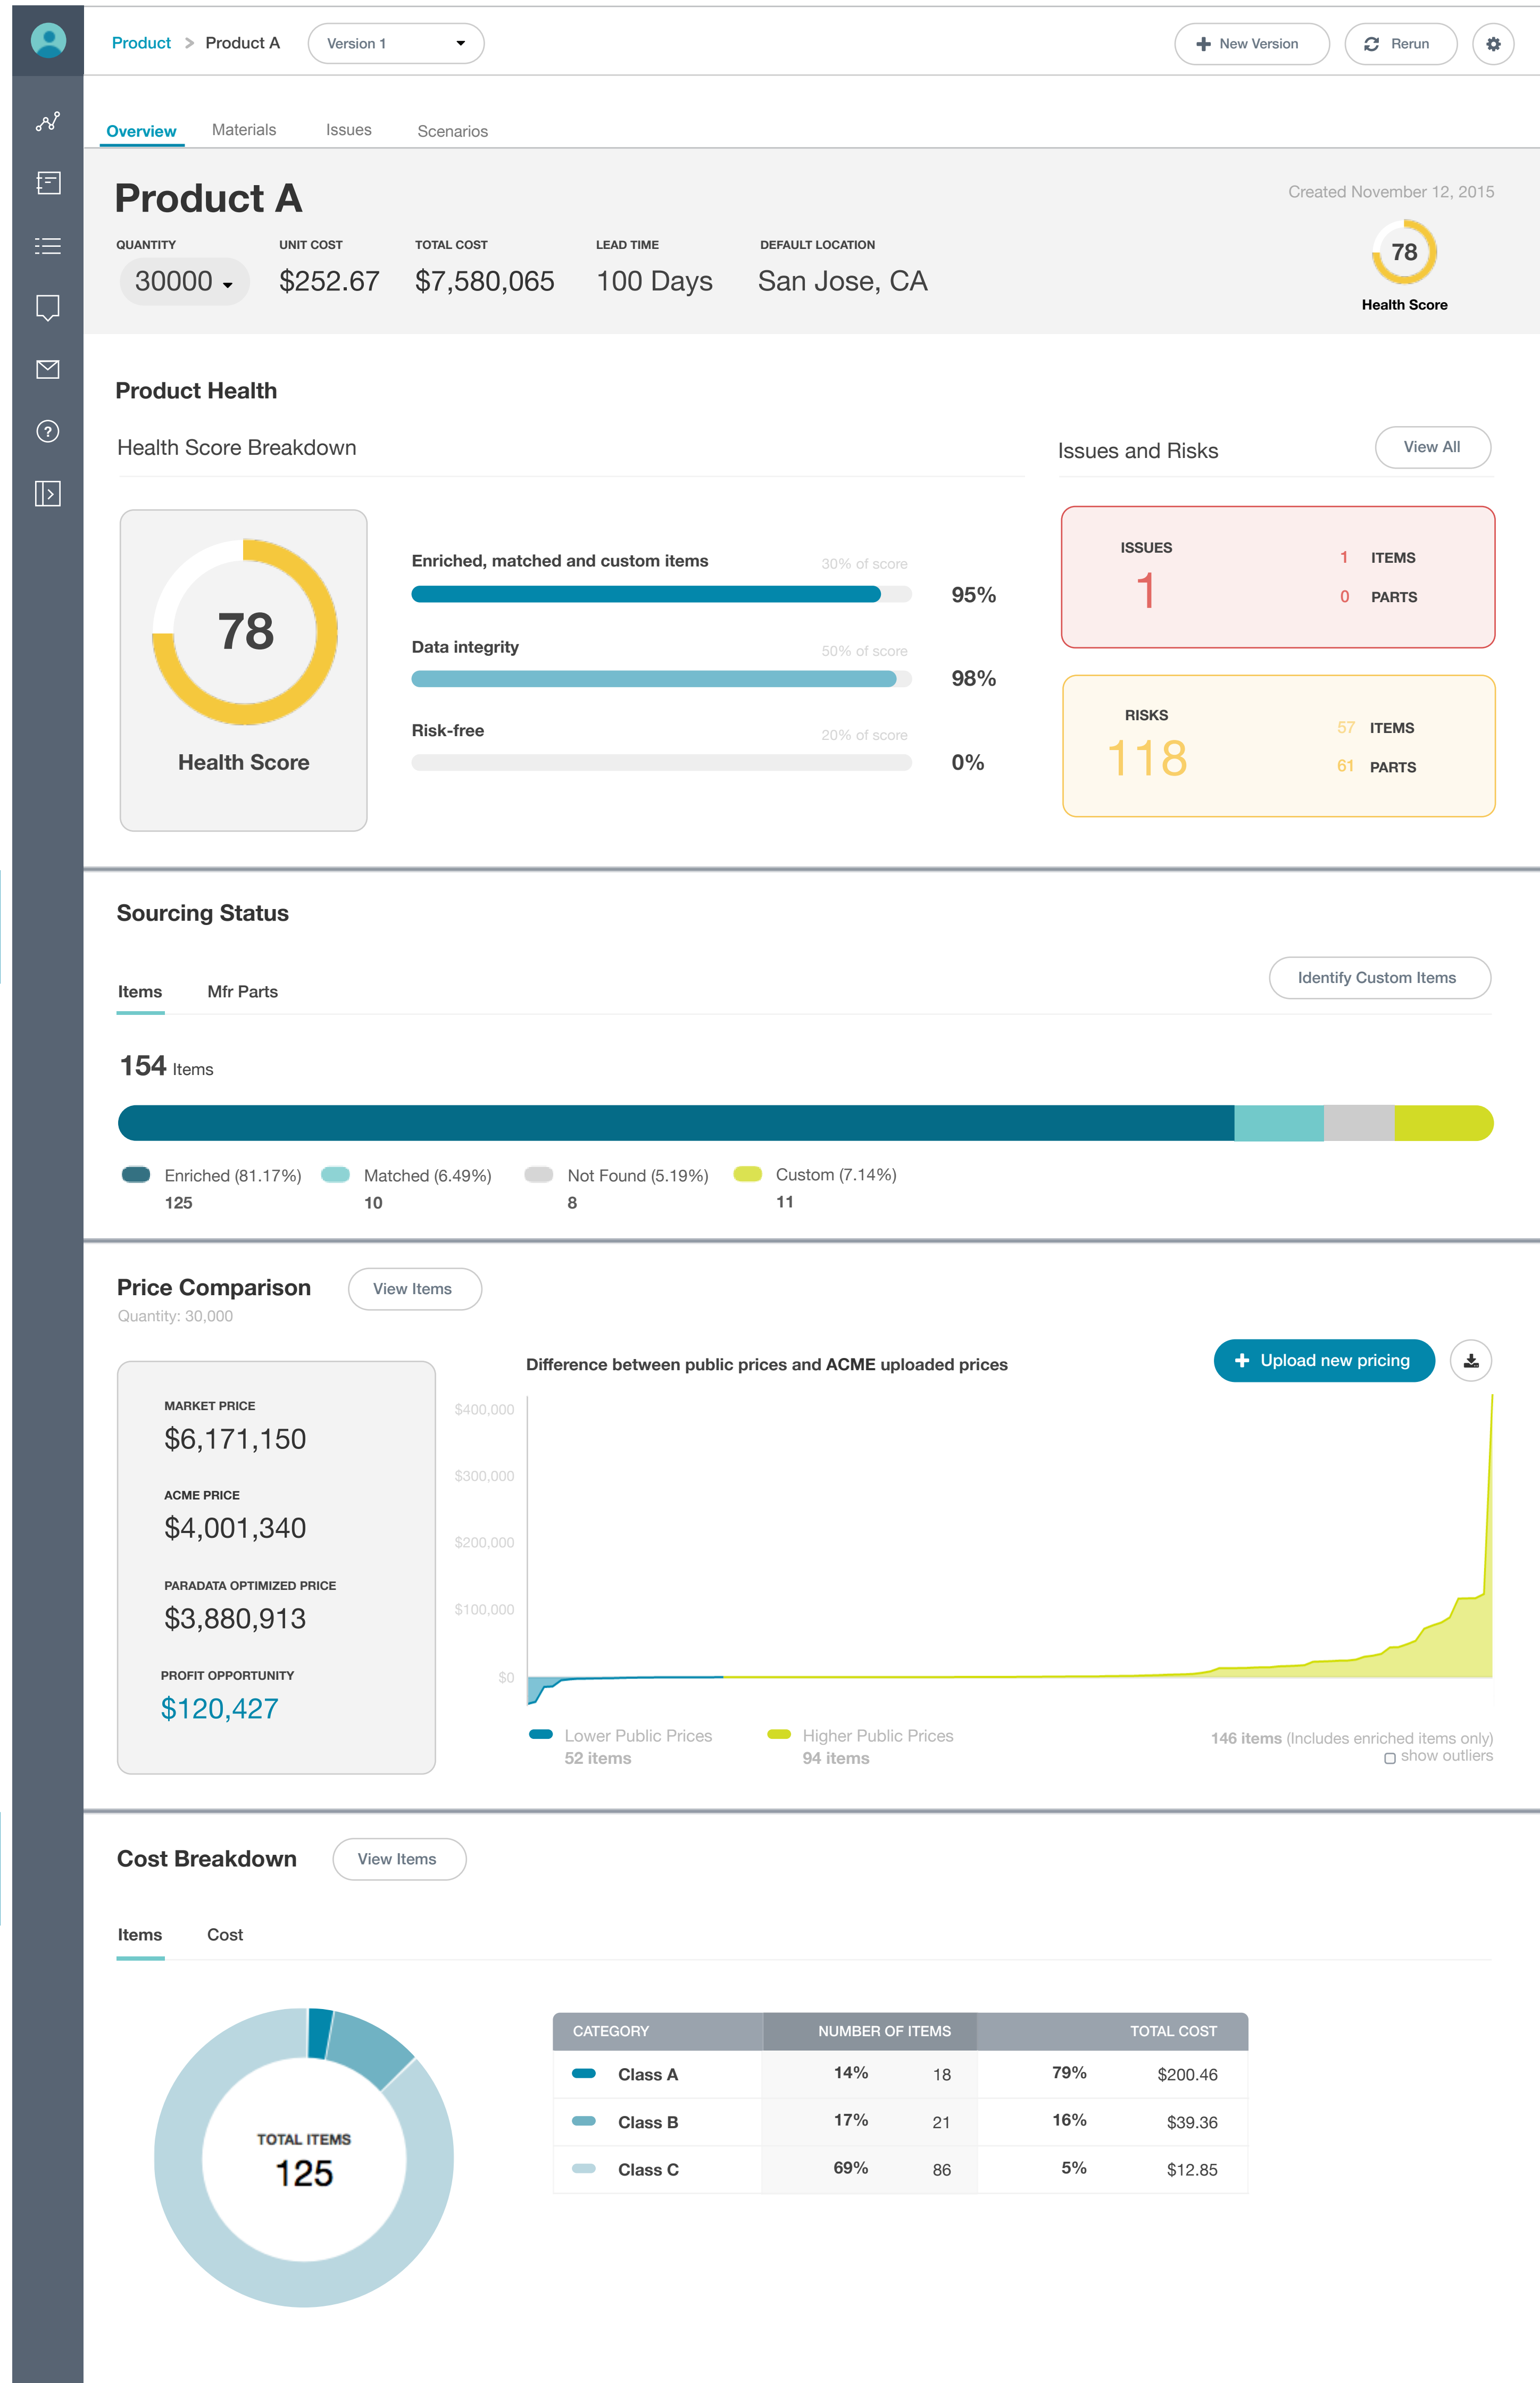

**BOM Resilience**  
Measures ability to source multiple suppliers. (AML/AVL)

**External Partner Collaboration**  
Measures partner participation for pricing, lead-time & event notification.

**Supplier Quality**  
Measures the supplier's ability to deliver consistent quality products. (OTD, Returns, etc.)

**Supplier Financial Health**  
Measures suppliers financial health.

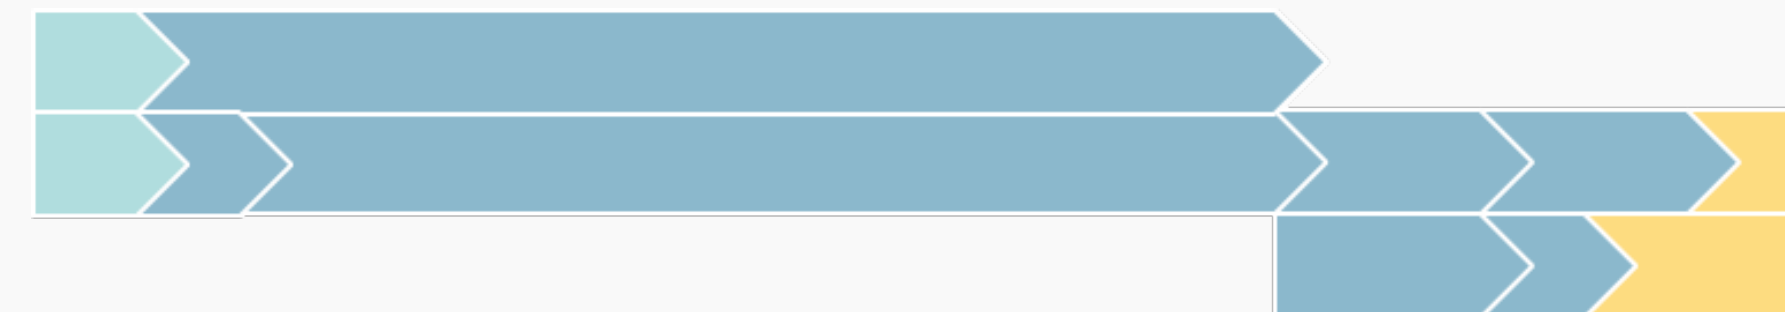

SAAS PLATFORM

Identify risks & issues in your supply chain

Items that are single-sourced	57 Risks
Parts that are near end of life	6 Risks
Parts with poor availability	41 Risks
Parts that are not RoHS compliant	2 Risks
Parts that are missing RoHS compliance data	12 Risks

Process data in seconds

Use sourcing information to optimize

ITEM	ITEM DESCRIPTION	QTY	UNIT PRICE	EXT. PRICE	UPLOADED PRICE	UPLOADED EXT. PRICE	UNIT DIFF. %	DIFFERENCE	VAR. %	RESULTS
