Story

Narrative

NPI

Requestor

- As a NPI I want to understand what data I need to improve the health of my BOM.
- As a SCO / SBM I want to understand what potential sources can provide me data that I am missing.
- As a SCO / SBM I want to prepare a RFI to send to source(s) who can provide me data that I am missing.
- As a SCO / SBM I want to send a RFI that I have prepared to sources.
-
- As a SCO / SBM I want to track responses from my suppliers.
- As a SCO / SBM I want to extend the time my supplier has to respond.
- As a SCO / SBM I want to add additional parts / attributes to my request.
-
- As a SCO / SBM I want to be alerted when a supplier response is available
- As a SCO / SBM I want to review a supplier response and accept the data
 - How to handle partials / exceptions?
- As a SCO / SBM I want to analyze the results of my supplier responses and understand the impact to my BOM (part category)
- As a SCO / SBM I want to understand the impact of the response to my supplier's score
-
- review history / tracking information on request

Requestee

- As a supplier-partner I want to be notified when a customer needs info from me.
- As a supplier-partner I want to update the information requested by my customer.
- As a supplier-partner I need to send a request to someone else in my company to provide data that I do not have.
- As a supplier-partner I want to submit my response to my customer
- As a supplier-partner I want to receive a notification telling me that my submission was accepted.
- As a supplier-partner I want to understand my score and how my response has improved my score.
- Request an extension

Paradata

- As a paradata marketer, I want to tell the supplier-partner how much time they saved because paradata has provided some information to the customer already.
- As a paradata marketer I want the supplier to understand what of the data they have entered will be leveraged for other customers and they will not have to enter it again.

Paradata System

- associate sources with a supplier catalog
- proactively send a reminder to suppliers to complete their data

Quarterly Cost Downs / Recurring Cost Analysis

- As a SCO / SBM I want to set up a recurring RFI and send it to a source.
- As a SBM... improve the health of my assigned part category.

Acceptance Criteria

#	Title	Given (context)	When (event)	Then (outcome)

1		<i>and the card is valid</i> <i>and the machine contains enough money</i>		
2				
3

Impact Checklist

(Check to indicate that **there is an impact**. Based on the product being developed, add to this checklist any additional impact)

- Local Caching
- Distributed Caching
- Version Conflict
- Run Time Support
- Encryption
- Backward Compatibility
- Assess impact to authentication
- Upgrade & impact to existing account
- Duplicates?
- Impact to retention policies
- Assess impact to performance testing framework
- Assess need for user interface
- Assess impact to data warehouse
- Do min / max validations apply
- Assess impact to reports
- Are documentation changes required
- Does this impact audit logs
- Does it impact disaster recovery
